Re: End of Life Announcement – H Series

Dear Valued Customer / Partner,

The 2001 version of the safety agency specification UL 60950-1 for power supplies expires in December 2010. Usually revision changes are minor for industrial power supplies, but the 2005 version would necessitate retesting and compliance to the immunity specification EN61000-4, which is expensive in both fees and Engineering opportunity cost.

TDK-Lambda has reviewed sales of our older products and will be issuing a last time buy notice for the models with the prefixes:

HDA, HDB, HDC, HSB, HSC, HSD, HSN, HTC, HTD & OVP12

TDK-Lambda recognizes that as a past customer of one or more of these products, you may need additional units until substitution testing is complete or for service spares. We are offering a last time purchase opportunity for these products until July 30th, 2010. All deliveries will be before November 30th, 2010. Please understand that these orders would be non-cancelable and non-returnable.

Sincerely,

A handwritten signature in black ink, appearing to read 'DNorton', written in a cursive style.
