

6310-DX Remote Mounting Kit

INSTALL IN MINUTES WHERE CELLULAR RECEPTION IS STRONGEST

The Accelerated 6310-DX is a secure 4G/LTE business router with the CORE plug-in modem that can be used as a primary 4G/LTE data connection or as a backup network solution to streamline business continuity. By adding the 6310-DX to your network, any Ethernet device can utilize fast and convenient cellular data, and the 6310-DX can be located or mounted where the cellular reception is the strongest.

6310-DX can be located to capture the strongest cellular signal strength.

The optional Site Survey Battery Pack, Passive Power over Ethernet (PoE) adapter, and mounting supplies increase placement flexibility and help locate the area where the signal is strongest. The 6310-DX can also operate in IP Pass-Through or in full Router mode to meet your specific needs.

6310-DX Remote Mounting Kit Includes

- Two (2) cable ties
- Two (2) narrow ceiling rail snaps
- Two (2) wide ceiling rail snaps
- One (1) POE cable assembly
- One (1) temporary site survey battery pack
